

To help save your breath, life, money & planet...

**Some things real conservatives can do
to help kick the petrOILeum habit:**

- **Trip-link**
- **Car share**
- **Drive less**
- **Go carless** (and save over \$500,000 over a lifetime in automobile related costs)
- **Base mode choice on trip distance**
- **Devalue & pay less for automobiles**
- **Buy small and rent larger as needed**
- **Negotiate a fuel inefficiency deduction for less than cost-optimally efficient vehicles.** (Conventional new vehicles are as much or more than 25% less efficient than they can be cost effectively made to be with technologies that have been available for five to ten years or more. Negotiate this cost of inefficiency into your car deal on top of your dealer and manufacturer negotiated profit price, if you cannot or will not go carfree, consider going carless.)
- **Support auto-alternatives for self and others**
- **Tell auto makers to make cleaner-air and flexible-fuel, and more fuel efficient vehicles**
